

Whitepaper : Based Sharon (Share-On): Empowering Memes and Embracing Philanthropy on the Base Network

Abstract:

This white paper introduces Sharon Coin, a meme-inspired cryptocurrency built on the Base Network blockchain. Sharon Coin aims to foster a vibrant and inclusive community while incorporating a charitable aspect that the community will actively participate in. This paper outlines the key features, tokenomics, charity initiatives, and transparency measures associated with Sharon Coin.

1. Introduction

Sharon, dubbed the recent ex-girlfriend of Based Brett, aims to combine the fun and engaging nature of meme culture with a built-in philanthropic aspect. By leveraging the Base Network blockchain, Sharon Coin empowers users and members of the sharon community to participate in a vibrant community while making a positive social impact.

2. Tokenomics and Distribution

The tokenomics of Sharon Coin have been designed to support community engagement, reflection rewards, and charitable initiatives. A 2% use tax is implemented on each buy transaction and a 3% use tax is implemented on each sell transaction. Out of the buy tax, 1% goes back to holders as reflections, .05% goes to the marketing wallet and .05% goes to the charity wallet. Out of this sell tax, 1% will be redistributed to holders as reflections, 1% will be allocated to future development projects, and 1% will be directed to a charity wallet.

3. Philanthropic Partnerships

Sharon Coin is committed to making a difference in the lives of those in need. The allocated 1% of each transaction will be sent directly to a dedicated charity wallet. To ensure transparency and effective management of these funds, Sharon Coin has collaborated with a respected and well-known social media influencer who has the same charitable vision as our development team. This influencer will document the giving in videos on their channel using us as a sponsor and we will in turn publicize it on all of our social media channels taking the guesswork out of where and how much of the funds were donated. This partnership will bring credibility, vetting expertise, marketing and ensure that the funds are utilized responsibly.

4. Transparent Transactions and Accountability

Sharon Coin takes pride in promoting transparency and accountability. All transactions involving the charity wallet will be recorded on the blockchain and made publicly available. The contract will be renounced and there will never be any changes to total supply and no further coin will be minted. LP token will also be burned. This facilitates complete transparency in terms of how funds are allocated, who the beneficiaries are, and the impact created through charitable endeavors.

5. Community Engagement and Governance

Sharon Coin fosters an enthusiastic and tight-knit community, allowing users to actively participate in decision-making processes. Through voting mechanisms and community proposals, token holders can contribute to the evolution of Sharon Coin, such as future partnerships, charity selections, and expanding the coin's utility.

6. Roadmap and Future Development

The roadmap for Sharon Coin encompasses the launch of essential features, including the development of community engagement platforms, and integration with popular social media channels as well as developing our own board and social media platform so eventually we can promote charitable actions with our own team and include the community in selection of Sharon coin gift recipients. Ongoing efforts will focus on scalability, enhanced user experience, and fostering strategic philanthropic alliances. We intend to be the #1 coin that focuses on community and charity at the same time. We will be vigilant in building partnerships and making Sharon Coin available on as many platforms as possible, as quickly as possible. We also believe strongly that marketing is an essential part of a successful coin. We will continue to develop new ways to engage new community members to ensure continued growth.
